

## Training package for Regional Stakeholders

*Under the title “Enhancing multi-stakeholders’ capacity to engage in regional smart specialisation strategies”, the RE-ACT training package for regional stakeholders from the quadruple helix (other than Higher Education Institutions – HEIs) offers a journey through the key concepts related to RIS3 and regional development, preparing organisations and individuals to fruitfully engage in regional collaboration.*

### Training modules

The training programme for other regional stakeholders of the quadruple helix aims to make representatives from the business sector, governing bodies and citizens more aware, informed and willing to participate and contribute to regional development.\*

#### Enhancing multi-stakeholders’ capacity to engage in regional smart specialisation strategies

- **Module 1:** About and around RIS3: What, Why, What for?
- **Module 2:** The stakeholders of RIS3: Who? To whom?
- **Module 3:** Reach-out and benefit from RIS3: How? What now?

\* There is a specific training package for Higher Education Institutions

The training modules, practical exercises, additional materials and training support materials are available on the [RE-ACT project website](#) and can be used free of charge.

### Training support materials

Training modules are complemented by a manual and guidelines to support trainers and/or training providers who wish to implement the training programme for regional stakeholders.

- **Trainers Manual:** includes presentation of the course, training resources, recommendations for training implementation, suggestions of support tools and forms, including for evaluation.
- **Guidelines for the selection of Trainers and Trainees:** includes the requirements that trainers and trainees should fulfil in order to successfully implement the course.

**RE-ACT – Self-reflection tools for smart universities acting regionally**, aims at supporting HEIs to rethink and reposition their strategies, structures and actions through a holistic approach to innovation and entrepreneurship, regionally embedded and supported by collaborative links among key actors of the quadruple helix.
